

G LABS BOX | USER MANUAL

1 Plug in the HDMI cable from the TV to the G Labs Box.

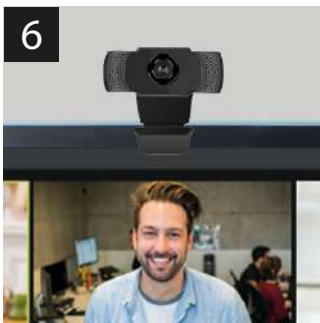

2 Set up the keyboard remote.

3 Remove the back panel of the G Labs Keyboard remote. Pull out the USB plug from the left side. Insert the USB plug into the G Labs BOX USB input.

4 Put back the panel on the back of the keyboard remote.

5 Turn on the G Labs Keyboard remote on the top right.

6 Add the camera on top of the TV. Plug in the camera USB input to the G Labs Box second USB input.

Optional: plug in a CAT5 ethernet cable to the back of the cables box that connects directly to your router. If you do not have an ethernet cable you can connect to the internet with WIFI.

7 Change the HDMI input on the TV to the same input you plugged into the back of the TV.

8 Add the power adaptor to the G Labs Box.

9 As the G Labs Box is booting up you will see the G Labs Box logo. After the G Labs Box logo, you will see the G Labs Box menu with apps such as Zoom, Facebook Messenger, and other apps on your TV screen.

10 Use the up-down-left-right and Ok buttons or the mouse touchpad to navigate to Settings.

11 Under Settings

12 Select the Network Connection

13 Choose your WIFI connection.

14 To recharge the G Labs Keyboard Remote, insert the micro-USB plug into the keyboard remote and plug the USB to any power source.
